

Principles of Software: Homework #2 Collaboration

Due on March 5 2021

Prof. Valera

Jared Gridley

I did collaborate with other students.

Cat Chu - Discussed some common dafny errors and things we tried to fix them, like assertion errors might mean that you forgot the semicolon, but I did not show her my code or look at hers.

Josh Park - Talked about some errors I got from the dafny compiler but we did not talk about our own code, more stuff we either got from lecture notes or TA office hours.

Andrew - Talked about common syntax errors but nothing code specific.
